Have always used it for your average car bumps to having in headphones. That been said your latest update has made downloading content more difficult to listen to as a playlist in and out of itself. Typically I would just press the first song (latest downloaded) and continue to listen to everything through there. Would love the resolution to that.....nvm fixed it . In the new update it works more terrible & the previous version was cool already without a fixing I see I'm not the only one that feel like this . For Example my downloaded music isn't really downloaded no more because even though it says I've downloaded my songs in the option category the whole song list of the album or mixtape pops in my download list showcasing the songs I haven't downloaded and of course there's a reason for someone not downloading specific songs (not wanting to hear the ones you didn't want to listen to) and it plays ALL the songs that I haven't downloaded nor even wanted to hear anyway (that's why they're not downloaded).... Why have a download category In this new update if your going to put the whole album or mixtape in the list anyway that's supposed to be specifically organized to the users liking am I right or wrong ? and continue to play the songs you haven't downloaded including the ones you did just for it to play the songs you haven't downloaded anyway automatically. It's like the downloaded music option isn't even a working function it's just a symbol now . The way they made the app now downloaded music is just a option and isn't literal at all !!!! FIX THIS PROBLEM ASAP PLEASE !!!!!!! It would be nice if you could have the playlist sort by when you add songs instead of the random sort feature they have now. When adding to a playlist it gets shuffled and is not in an order that is playable it just messes up the whole point of having a playlist feature. This app is better than datpiff in so many ways but if they could just fix the playlist option it would be a top contender for sure. Currently I love the ability to upload my mixtapes as a content creator. I would love to see some actual MyMixtapez items in the shop instead of what they currently offer. Like it would be nice to have a MyMixtapez shirt, beanie, or even a SKIMASK. Why does the shop have stuff that's not even related to MyMixtapez is the question?
